

MANIFESTO 1.0

METANOIA COMMUNITY is a group of global citizens who know that the solution to current world challenges lie in ACTION.

Too much time is spent theorising, doom scrolling, focusing on differences and so forth while what needs to happen is to develop the **habit of ACTION**, **COURAGE** and **small DAILY victories** in the largest possible number of people against the systems that oppress all of us.

Our community aims to:

- STOP the flow of money and power from the bottom to the top
- help people and communities to create a new system
- strengthen local action and associations
- encourage local focus and local living
- support small and medium businesses
- encourage people to join local politics
- foster inter-generational solidarity
- disseminate nature-based solutions
- facilitate the application of global knowledge to local challenges
- deepen mutual understanding among people

We all see the limits of monopolies, of mainstream media, of concentration of power in the hands of a small number of individuals, corporations and power centres.

The **METANOIA COMMUNITY** aims to bring back the power to SME, to people, to associations, to local politics, to independent journalists and, in a nutshell, to the 99.9% of the population who does not really benefit anymore from the current system.

[Join us today](https://www.metanoia.community) in this adventure to reshape the future.
